SUMMARY

Strategic and execution-focused Product Manager with 5+ years of experience leading AI-driven innovation, cloud migration products, and platform transformations at Microsoft and Persistent. Proven track record in unlocking over \$4B in cloud migration opportunities, reducing partner onboarding time by 75%, and driving assessment accuracy improvements by up to 60%. Adept at cross-functional leadership, customer-centric design, and GTM strategy. Former DevOps engineer with hands-on Kubernetes expertise and a bias for action.

EXPERIENCE

*Microsoft, **Product Manager II | Azure Migrate***

May 2023 - Present

As a Platform Product Manager for Azure Migrate Assessment, I am responsible for driving customer-centric cloud migrations by spearheading detailed migration planning with cost comparisons, target right-sizing, and tailored migration strategies to optimize Azure migration benefits.

- Launched advanced migration features, boosting assessment accuracy and Azure target coverage, unlocking cloud migration opportunity worth \$4B+
- Partnered with MySQL team, enabling discovery and assessment of MySQL workloads, enabling migration planning for 2nd largest database on platform
- Transformed assessments into a platform, enabling 1P & 3P partners on Azure Migrate, slashing partner onboarding time to Azure Migrate by 75%
- Revamped user experience and platform workflows to make the application centric, contributing to NSAT of 160+ through targeted improvements
- Pioneered AI-driven product initiatives from 0 to 1, to accelerate sales cycle, improving product accuracy by 30% and reducing feature TTM by 50%
- Orchestrated documentation design overhaul, creating 30+ high-impact articles, improving discoverability, and increasing NSAT by 5 points.
- Led go-to-market (GTM) efforts for several product enhancements, developed multiple focused sales motion to drive \$600M+ migration opportunity
- Advocated for Azure Migrate at multiple industry forums, reaching 2000+ professionals at multiple forums through thought leadership
- Collaborated with UX researchers, field and sales teams and external partners for customer studies, identified 100+ CX needs and product gaps
- Designed business dashboards, analyzing key metrics, identified gaps, proposed strategies to boost assessment efficacy from 30% to 60%.

*Microsoft, **Intern - Product Manager | Azure Networking***

Apr 2022 - Jun 2022

As a product management intern, I evaluated the feasibility of bundling two L7 load balancers and developed a comprehensive product roadmap. This project resulted in a full-time offer based on my impactful contributions.

- Engineered key product metrics-Attach Rate & Usage Factor, meticulously analyzed 100M+ data points to drive feasibility analysis
- Designed innovative telemetry tools & customized n/w tariff calculator, identified 10+ cost effective product bundle combinations
- Developed three-phase product roadmap, with cross-selling opportunity expected to generate an additional \$40M+/yr revenue
- Conducted compete analysis, identifying 750+ customers, interviewing 12+ enterprises, and shaping a targeted sales motion.

*Persistent Systems, **Lead Software Engineer | Microfocus SecureMail***

Jul 2018 - Jun 2021

As a Lead software engineer, my responsibilities included migrating an on-prem product to a SaaS offering, which included breaking a monolithic Linux ISO based email encryption product into microservices and hosting it on cloud.

- Cloud-Enabled Email security product, penetrated individual user market enabling 100K+ users with Office365 and GMail plugins
- Enhanced customer exp., accelerated encryption processing by 500% by engineering resilient processing & networking infra on AWS
- Led team of 5, conceptualized SaaS offering and containerization strategy, automated cloud orchestration, potential rev. \$300K+/yr
- Collaborated with multiple stakeholders, automated support operations, driving support escalations reduction by 60%
